

# TRANSPARENCY-ONE

## SOURCE TO SOURCE SUPPLY CHAIN SOLUTIONS

### SOLUTION OVERVIEW

#### END-TO-END SUPPLY CHAIN MAPPING

- Monitor your entire supply chain from source to store
- Drill down to identify all of your suppliers
- Search for impacted products based on any product, component, or facility

#### ONLINE COMPLIANCE TRACKING

- Collect, verify, and manage safety, social, and environmental certifications
- Track compliance and visibility on sensitive components
- Define, communicate, and track supplier requirements
- Send custom surveys to collect additional supplier data

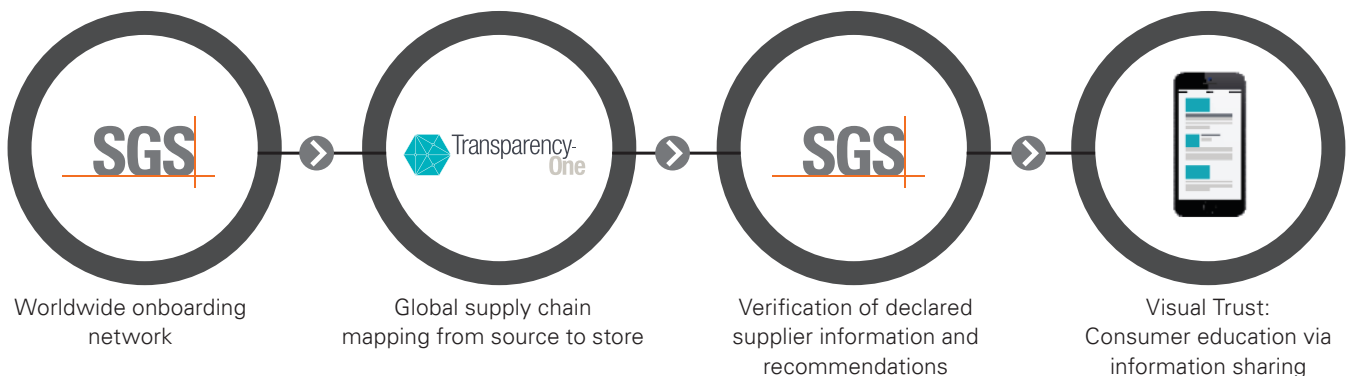

#### POWERFUL BUSINESS INTELLIGENCE

- Analyze aggregated data through efficient dashboards
- View custom reports based on your business priorities
- Assess risks for product safety, social responsibility, natural disaster, and resilience across the entire network

## CONNECT SUPPLY CHAINS TO CONSUMERS

SGS AND TRANSPARENCY-ONE HAVE PARTNERED TO OFFER VISUAL TRUST, A DIGITAL SUPPLY CHAIN SOLUTION TO HELP BUSINESSES BUILD CONSUMER TRUST.

## ONBOARDING PROCESS

SGS, a global expert in testing, inspection and certification, provides personalized onboarding and supplier support services in 150 countries to ensure faster adoption of the Transparency-One solution

- Dedicated Project Manager
- Alignment meetings with client
- Communication plan preparation with client
- Import of existing data
- Targeted onboarding campaign
- Platform training webinars
- Self-onboarding with SGS support
- Onboarding in local language
- Customer support via e-mail, call center and live chat

## TECHNOLOGY

Transparency-One is very secure. Security of your data is our #1 priority.

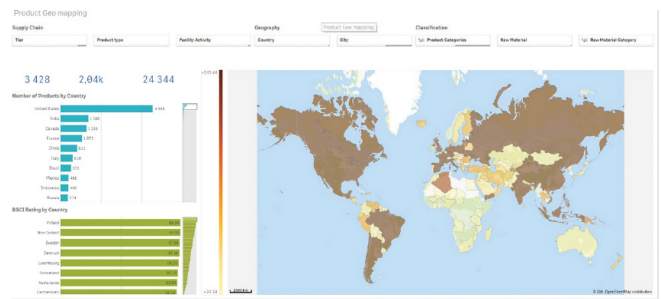

- Transparency-One is deployed on **Microsoft Cloud (Azure)**. Microsoft Cloud (Azure) is protected at the physical, network, host, application, and data layers, so Transparency-One online services are resilient to attack.
- Achieve an even higher level of protection and create a permanent record of all supply chain interactions by adding your data to the **Microsoft Ethereum blockchain**.
- Transparency-One supports **GS1 standards**.

## BUSINESS INTELLIGENCE

Detailed data analysis is crucial for managing supply chain risk. Dive deep into your supply chain to:

- View and analyze aggregated data through efficient dashboards
- Incorporate third party data into your dashboards for deeper insights
- Create custom reports based on your business priorities
- Visualize supply chains with the power of geomapping
