

# Digital Solution for Source to Store Supply Chain Transparency

## Sustainable Sourcing

Map complete supply chains to the source and assure sustainability standards at each level

- Track raw material volumes or individual products for sustainability reporting
- Establish sustainability requirements and collect relevant data from suppliers at all levels
- Collect detailed data on sustainability practices through custom surveys

## Why Transparency-One?

The Transparency-One solution offers two unique services to ensure sustainable practices throughout the supply chain:

- **Multi-tier approach** via a B-to-B social network platform. Collect data on your suppliers' environmental practices, one tier at a time, down to the source.
- **Partnership with SGS** for global supplier onboarding support and data verification. Complete supplier participation ensures comprehensive, validated information, so you can make the right decisions.

Identify and address potential risks in your end-to-end supply chain to ensure regulatory compliance and responsible business.

## ABOUT TRANSPARENCY-ONE

Transparency-One enables companies to discover, analyze and monitor all suppliers, components and facilities in the entire supply chain. Transparency-One combines cutting-edge graph database technology, supply chain expertise, and global supplier onboarding services to help all supply chain stakeholders reduce business risk. The company has offices in Boston and Paris.
